

A dramatic, low-key photograph of a musician with long, dark, curly hair, wearing a grey military-style jacket with gold buttons. The musician is playing a bright yellow electric guitar and has their head tilted back, eyes closed, in a moment of intense performance. A silver microphone on a stand is visible in the upper left corner. The background is dark, and a sharp red diagonal line cuts across the lower left portion of the image.

A SHOW OF imageFORCE

Redefining office print

The power to move

Canon

MEET YOUR NEXT STAR PERFORMERS

imageFORCE C5100 Series

Driving digital transformation in busy offices.

imageFORCE C7165

Your partner for new creative possibilities and in-house excellence.

imageFORCE 6100 Series

Accelerate digitalisation with this smart A3 B&W MFP.

imageFORCE 1440P Series

Accessible B&W A4 SFP perfect for desktop use.

imageFORCE 1440 Series

A compact B&W A4 MFP for seamless functionality in small spaces.

imageFORCE 710 Series

Meet a wide range of office needs with this high-speed B&W A4 MFP.

imageFORCE C3150

For printing little and often – at speed.

imageFORCE 8100 Series

A high volume, high quality black and white powerhouse enabling professional finishing.

imageFORCE C1333P

Discover essential office functionality in A4 colour.

imageFORCE C1333 Series

Ad-hoc print and scan capability for personal or department use.

imageFORCE C611 Series

An A4 colour workhorse boasting high productivity printing and fast scanning.

AN imageFORCE TO BE RECKONED WITH

Our AI trained machine learning multifunction printer range delivers stunning quality and long-lasting performance. imageFORCE energises your business, helping you grow faster and invigorating your daily work, all while offering seamless security, class-leading reliability, and impactful sustainability. Within the range, you can even unlock new opportunities for in-office creative printing.

Designed to redefine how businesses approach their office needs, the imageFORCE range is dependable, productive, and innovative.

It's a technology solution that strengthens your everyday and empowers the extraordinary.

Product images shown are for illustration only. Actual product configurations may differ.

DEFEND FROM END TO END

Your security benefits with imageFORCE

Protect your business

Canon 360° Security is designed to protect devices, documents, networks, and cloud locations with the latest security features. An intelligent automated process for security setting recommendations quickly learns and adapts to cloud-based security trends.

Prevent security breaches

From stringent encryption for your devices and documents to smart multifactor authentication and embedded Trellix McAfee malware protection, imageFORCE strengthens your security perimeter to prevent breaches.

Ensure Zero Trust

imageFORCE devices support a Zero Trust security architecture, demanding authentication at every access request to ensure the highest level of protection within your network.

Boost compliance

The flagship models offer the latest security technology with settings recommendation powered by machine learning AI-trained firmware or seamless authorisation using OAuth 2.0 and Microsoft Entra ID. This helps you to stay head of evolving compliance legislation, avoid fines, and safeguard your brand equity.

Harness data insights

The security settings recommendation feature built into every imageFORCE device helps users and IT admin to determine which type of environment the device is in, such as public network, direct internet connection, and more. It can then recommend the most appropriate network settings, and even alert you when the network environment changes.

Powerful safeguarding: compatible solutions and services

imageFORCE devices come with a wealth of in-built security features – but it's also part of our wider security offering, with a range of services you can draw on as needed:

Office Health Check Service:

establish a benchmark and identify potential vulnerabilities in your environment.

Device Hardening Service:

connect new devices pre-configured with recommended security settings and functions to the network.

Data Removal Service:

remove and wipe hard drive to securely erase sensitive data at device end-of-life.

Enhanced Subscription Service:

Offering a comprehensive device lifecycle protection through configuration hardening, automated firmware updates, data backup, and secure data destruction.

Premium Subscription Service:

A step further by delivering advanced protection with tailored security profiles, proactive management, real-time threat detection, rapid recovery, and in-depth security analytics.

Experience seamless AI-powered security with imageFORCE

Protecting a modern business from cyber threats is a complex and ever-evolving challenge. But the wrong solutions can cause information bottlenecks, forcing your teams to navigate unnecessary security obstacles.

With imageFORCE, security and performance go hand-in-hand. Machine learning AI trained firmware recommends optimal security settings, while smart authentication keeps information flowing seamlessly through your business.

The result? Comprehensive protection for your documents, networks, and devices, showcasing holistic cybersecurity at its simplest.

Strike a balance between safety and flow

Machine learning AI-trained firmware recommends the best security settings for your environment, bolstering your network perimeter.

The flagship models within the range use the OAuth 2.0 open standard authorisation framework for seamless connection to cloud-based services, including Microsoft Teams and Google Workspace, so you can scan paper documents straight into your digital workflows.

Microsoft Entra ID cloud-based identity and access management provides authentication for various Microsoft services, such as Microsoft 365, Dynamics 365, Microsoft Azure, and other third-party services.

High-definition exposure technology brings premium print quality to the office.

Durable, high-quality materials guarantee optimal performance, today and tomorrow.

And machine learning powered predictive maintenance cuts costs, emissions, and downtime.

Using a high-density array of OLED light-emitting chips, our new technology reduces light spot size and minimises colour drift. Since the light source can be placed closer to the drum, it takes up less space and enables a more compact design, leading to the highest ever resolution in an office printer: 4800 dpi vs 2400 dpi.

Drum

Reflecting mirrors

This diagram illustrates a laser-based optical measurement system. A red laser beam originates from a source (labeled 'Drum') and is directed through a series of reflecting mirrors (labeled 'Reflecting mirrors') to measure the distance to a target surface. The background shows a complex mechanical structure, likely a drum, with various components and wiring visible.

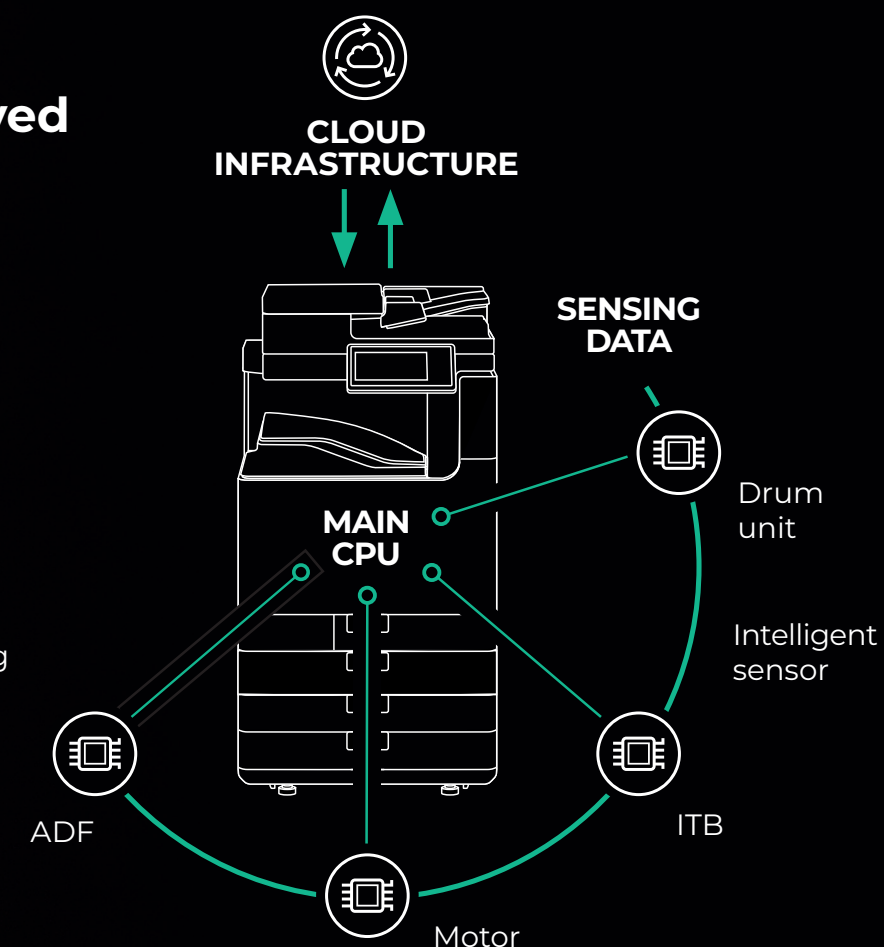

Drum

Light-emitting chips

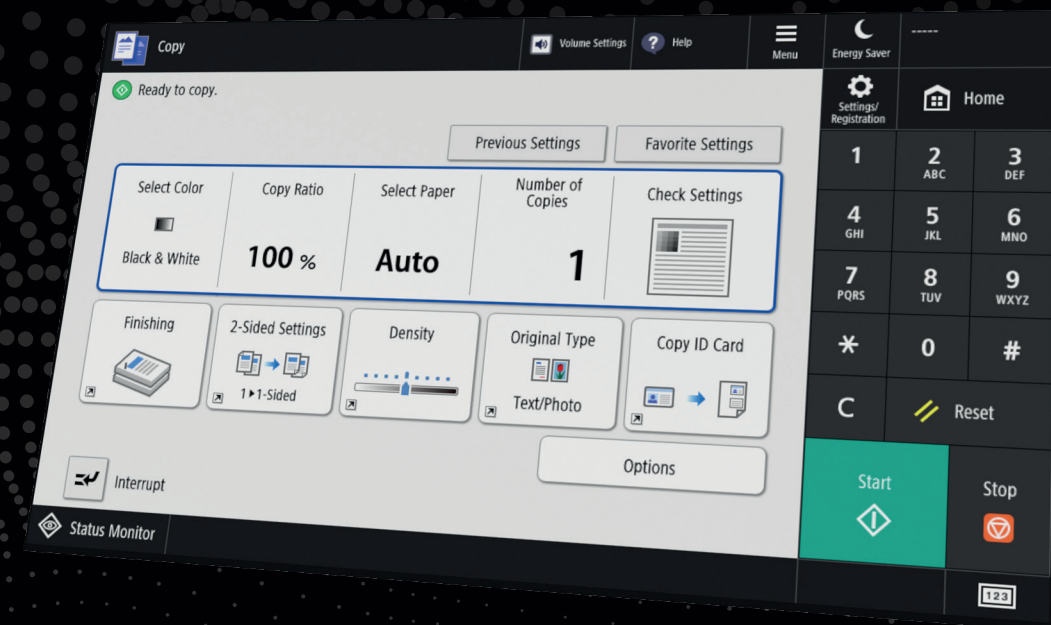

The diagram shows a top-down view of a drum with a central hole. A green circle highlights a small component on the drum's surface. A green line connects this circle to a larger, magnified view of the component, which is a light-emitting chip. The chip is shown emitting a red beam of light. The label 'Drum' is placed next to the top-down view, and 'Light-emitting chips' is placed below the magnified view.

Harnessing smart sensors and AI-driven predictive maintenance, imageFORCE devices use smart sensor technology to continuously monitor your device's health and prevent failures before they happen.

This typically cuts unscheduled downtime, ensuring business continuity and minimising unforeseen costs. What's more, fewer service visits mean reduced CO₂ emissions from transport.

FIND YOUR FLOW WITH INTUITIVE UI

imageFORCE devices feature an easy-to-use and intuitive user interface (UI), with a design consistent across all devices ensuring a seamless user experience. They're customisable too, meaning your employees can make it work for themselves most efficiently. Ergonomic design and intuitive control panels help your teams perform at their best without missing a beat.

Meanwhile, step-by-step user guides and troubleshooting videos help you get to grips quickly with more advanced features.

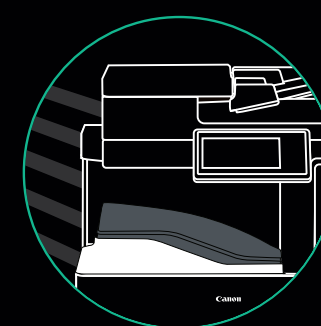

imageFORCE: designed for people

From the simplified display on the control panel to the paper tray, we've left no stone unturned to provide a better user experience for your workforce.

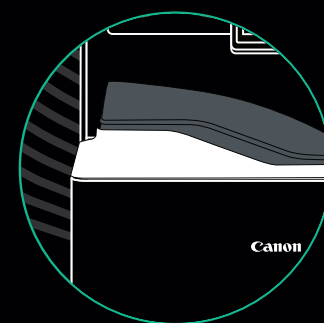

Easy on the eye

New icon design and layout makes the UI more accessible.

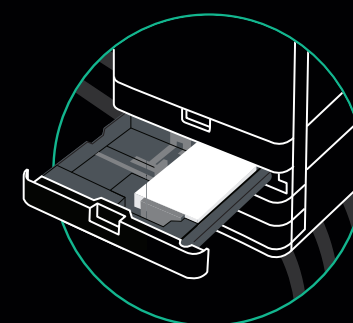

Built with people in mind

Prioritising functionality and ease of use, a universal design enables an ergonomic, user-friendly device that fits naturally into any workspace.

Simple unload

Ergonomic design of the paper output tray improves visibility.

Improved paper handling

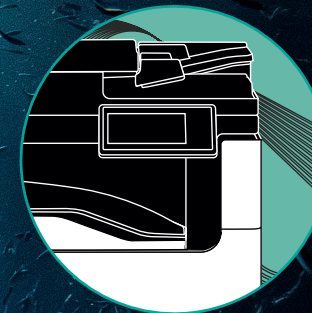

The cassette's new black interior improves paper placing and visibility.

Sustainability through the lifecycle

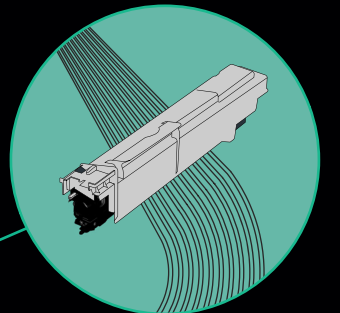

imageFORCE printers are developed with market leading technology to track environmental performance and reduce energy consumption

Choosing imageFORCE also helps conserve resources

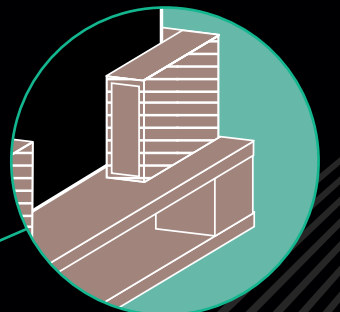

Each multifunction printer:

Contains up to 30% recycled plastics

Replacement drum covers are made of reused materials

Comes in easily recyclable cardboard packaging

imageFORCE devices are built to last. With more durable parts, they need replacing less often, reducing lifecycle carbon emissions and material use.

What's more, they have been developed to save energy and have market leading Typical Electricity Consumption (TEC) figures and features to track environmental performance and encourage responsible user behaviour.
