

Hosted Telephony solutions which exceed the demands of the workplace, wherever you are!

The workplace is constantly changing and Hosted Telephony can help you make these changes easier, whether you're in the office or working at home. Active8 will bring you the benefits of the latest technology, transforming your voice communications in the best possible way.

Easy to Budget and Easy to Use

We will ensure you receive the most cost-effective solution, bringing a significant reduction in your total cost of ownership. Alongside this you can enjoy free and unlimited calls to UK landlines and mobiles.

Hosted telephony will complement remote working

Flexibility is one of the biggest benefits as each user is able to connect to their extension via a traditional handset, using a smartphone app or Windows softphone client that can be accessed from any location. This allows you to take your office extension with you, and you can swiftly transfer calls to colleagues.

Why not add Telephony to the Cloud?

Our hosted PBX delivers powerful features straight from the Cloud. Our expert teams will ensure your phone system is always updated, monitored and maintained. Whether you have a single location or hundreds, Active8 can control your entire voice communications from a single, secure and cloud-based web interface. **One less thing to worry about!**

Why choose Active8 for your Telephony?

- ▶ We have a team of experts who understand and meet your business needs.
- ▶ We will support you in the challenges of changing work environments with our 'access from anywhere' handsets.
- ▶ We can take full responsibility for managing your complete system.
- ▶ Our technical teams are always available to assist with any concerns over operation or maintenance.
